

Notes
 This map has been produced using information provided by the Environment Agency:

- Environment Agency Flood Zone 3: Land assessed, ignoring the presence of flood defences, as having a 1% or greater annual probability of flooding from rivers or a 0.5% or greater annual probability of tidal flooding.
- Environment Agency Flood Zone 2: Land assessed, ignoring the presence of flood defences, as having between a 1% and 0.1% annual probability of flooding from rivers or between a 0.5% and 0.1% annual probability of tidal flooding.
- Environment Agency: Areas that benefit from flood defences: Land that may benefit from the presence of major defences during a 1% fluvial or 0.5% tidal flood event. These are areas that would flood if the defence were not present, but may not flood because the defence is present. Areas benefiting from flood storage areas may be remote from the flood defence structure.
- Environment Agency Flood Defences: The map displays the location of linear raised flood defences such as embankments and walls.
- Environment Agency Flood Storage Areas: Flood storage areas, land designated and operated to store flood water are shown in a separate layer.

Intended Use
 This map is intended to provide a strategic overview of flood risk from Main Rivers. It is not suitable for assessing flood risk for individual properties.

LEGEND

	Nottinghamshire County Council Administrative Boundary		Flood Defences
	Flood Zone 3		Areas Benefitting from Defences
	Flood Zone 2		Main River
	Flood Zone 1		

Notes: This map has been produced using the Environment Agency Detailed River Network data.
